Intern Job Duties (continued)

- Participate in replicated plot research and conducting farm research. This may include the following:
  - tri-state fertility test plots
  - nitrogen sensors evaluation
  - phosphorus management study

- Assist in planning, implementing and teaching educational programs, such as:
  - 4-H livestock quality assurance
  - Ohio Produce Growers and Marketing Association summer tour
  - fertilizer applicator certification training field day

The intern will work directly with the
- OSU Extension educator, Agriculture and Natural Resources

The other program areas that the intern will have an opportunity with which to work while in the office include
- Family and Consumer Sciences
- 4-H Youth Development

Intern Job Duties

The successful intern will be involved in these, or similar job duties and opportunities:

- Work collaboratively with OSU Extension and community members to develop a YouTube channel for OSU Extension – Delaware County, including script development, videography, production and editing of the video curriculum. The videos will relate to sustainable food systems and may include videos related to:
  - direct marketing
  - 4-H livestock quality assurance
  - Chef’s Camp (selecting meats/seafood, sensory food science, food safety, nutrition and new ingredient exploration)
