

ANSCI / ANR Educator Livestock In-Service

Calling all ANR Extension Educators:

Please consider attending the 2022 Animal Sciences / ANR Extension Educator In-Service held on Thursday, October 13th in the Animal Sciences Arena. With several new faces in both departments, this event will serve as a great opportunity to connect and begin planning livestock focused programs for 2023.

While on campus, you will have the opportunity to tour the Animal Sciences Building and meat lab as well as visit with faculty and staff.

To add more value to the program, we ask that you invite a livestock producer from your county to attend the event with you. As many of you know, the feedback we receive from our producers is priceless. Not only will you be able to better connect with your clientele, but your producers will also be able to share their experiences with others afterwards.

No registration fees required, and lunch will be provided. However, we do ask that you RSVP for meal planning by responding to this Qualtrics survey.
